

## **Environmental Student**

The Sydney Tar Ponds Agency seeks the services of a summer employee to assist and provide support to the Environmental Services Group and the Project Engineering Group on an as needed basis.

### **Education and Experience:**

We require a university student who has completed a minimum of 2 years in either a science or engineering degree program.

Knowledge of the history of the Tar Ponds and Coke Oven sites and ongoing clean up efforts will be an asset.

### **Qualifications**

- Effective written and oral communication skills. Must be able to establish and maintain working relationships with public, co-workers, contractors and government agencies.
- Good research skills and must be eager and willing to learn about technical scientific issues.
- Good computer and internet skills.
- Must be self-motivated and able to work effectively with minimal supervision.
- Good organizational and time management skills.
- Satisfactory completion of the medical surveillance requirements set forth in the project's health and safety plan.

### **Responsibilities:**

- Assist with air monitoring activities that take place during the cleanup. This involves overseeing air monitoring activities and reviewing reports generated as a result of these activities.
- Research and analyze data and prepare reports that will summarize historical and current data collected.
- Assist with environmental inspections of field operations to ensure regulatory compliance.
- Assist Project Engineering team in other related activities as required.
