

**Response to Queries/Clarifications
from Design Engineer
to the Sydney Tar Ponds Agency**

Tender # STPA2008S-23
Tender Title: Solidification & Stabilization – TP6B
Date: 03 February 2009
To: Jerome MacNeil, Contract Manager
From: J. Albury

Query/Clarification: (RFI 04) Questions forwarded to the Agency on 28 January 2009 via e-mail by [REDACTED]

Question:

1. On page 30 of the Master Health and Safety Plan a reference is made to:

"Shower and locker facilities are located at the Coke Ovens Security Compound and are available to contractors with the permission of the Agency". Can you tell me if this is true and how many employees could utilize the facility during TP6B?

Response:

The shower facilities at the Teak St. Security Compound are for decontamination purposes only and the location is out of the way for the TP6B Contractor. The Agency has a second shower decontamination facility, trailer, at the former Cooling Pond Site available for the Contractor's use. This too is only to be used as a decontamination facility for personnel. In addition the contractor would be responsible to maintain this facility. It would require water for holding tank, power hook up, emptying holding tanks as required and general house keeping.

Does this query/clarification warrant an Addenda? _____ Yes X No.

If "Yes", please generate an Addendum Notification using STPA Form F 60800 and put your response on that form.
